YOWON AI

Autonomous AI Jury Platform

Yowon Ai

Hackathon Project

75	CONDITIONAL_APPROVE	LOW
Overall Score	Deployment Decision	Risk Level

Generated: July 08, 2026 04:44 UTC

Executive Summary

Overview

The overall score is 75, indicating a CONDITIONAL_APPROVE verdict with a LOW risk level. The system demonstrates strengths in technical and innovation aspects, but requires improvement in security and scalability.

Evaluation Context

Item	Value
Selected Project Type	Hackathon Project
AI Detected Type	Enterprise System (62% confidence)
Scoring Rubric Used	Hackathon Project
Evaluation Standard	Prototype quality, innovation, demo readiness, and execution under time constraints
Score Band	Strong
Confidence	96/100
Evidence Quality	Exceptional
Repository Completeness	100/100

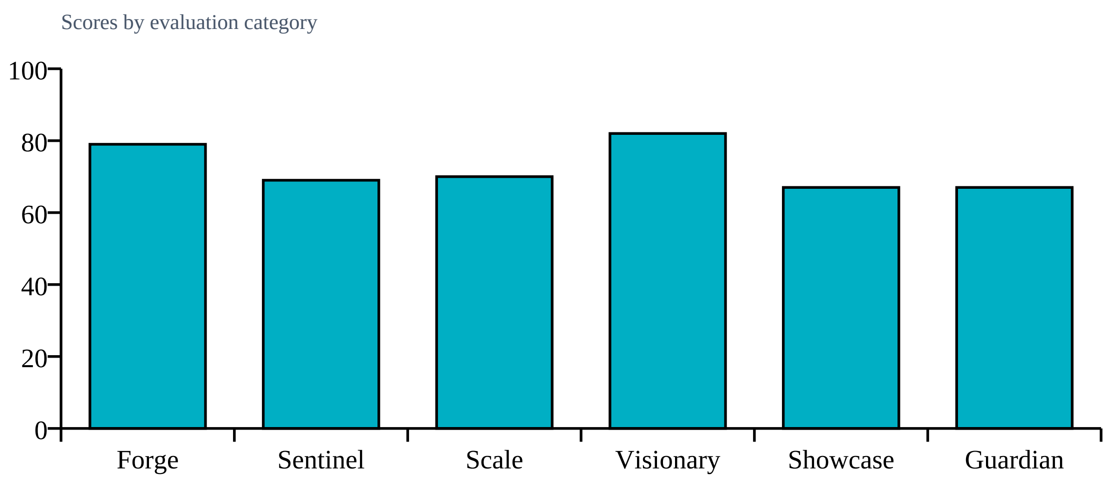
Repository Statistics

Item	Value
Total Files	285
Code Files	200
Documentation Files	26
Presentation Files	0
Test Files	32
Configuration Files	22
Deployment Files	4
Data Files	1
Source Modules	204
Meaningful Files	249
Repository Completeness Score	100

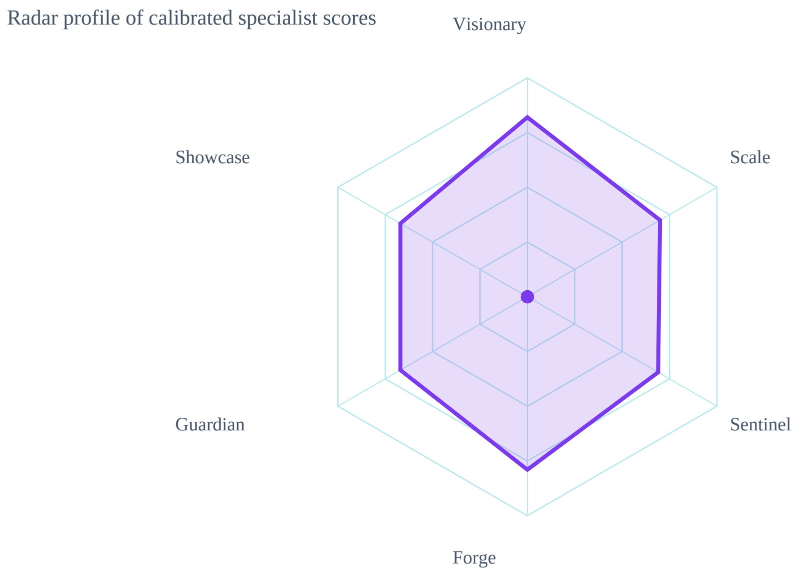
Score Table

Category	Score	Grade
Forge	79/100	B
Sentinel	69/100	B
Scale	70/100	B
Visionary	82/100	A
Showcase	67/100	B
Guardian	67/100	B

Category Score Chart



Radar Chart



Risk Visualization

Risk Area	Signal	Risk Level
Security Risk	LOW	||
Evidence Gaps	1	|
Deployment Readiness	75/100	||

Strengths

- Modular architecture with clear separation of frontend and backend
- Use of Docker for containerization and deployment simplicity

Weaknesses

- Static Analysis Health: 75.9/100
- Testing Health: 57.9/100

Positive Factors

- Source code detected
- Documentation present
- Automated testing detected
- Machine learning implementation
- Dataset artifacts detected
- Backend architecture present
- Deployment files present
- Modular architecture detected

Missing Evidence

- No additional missing evidence detected

Deployment Roadmap

1. Review and refine the modular architecture for improved scalability
2. Develop and implement a comprehensive testing framework
3. Integrate additional security features to enhance overall system resilience

Architecture Summary

Detected frontend, backend, database, ml pipeline, api layer, deployment layer, authentication, integrations, queues, vector databases, agent systems

Detected Technologies

- Celery
- ChromaDB
- CrewAI
- FastAPI
- LangChain
- React
- SQLAlchemy
- scikit-learn

Detected Algorithms

- Agent System
- Graph Algorithm
- RAG
- Random Forest
- Recommendation System
- Search/Ranking

Evidence Found

- Machine learning model
- Custom algorithm
- REST API
- Database
- Authentication
- Docker/deployment
- Testing
- Security implementation
- External integrations
- Queue/background jobs
- Vector database
- Agent system

Evidence Missing

- No missing implementation evidence recorded.

Project Type Justification

Detected Enterprise System from code/docs/repository signals.

Calibration Explanation

Implementation evidence increased confidence: Machine learning model, Custom algorithm, REST API, Database, Authentication, Docker/deployment. Community impact contributed a bounded signal (6/100, capped at 15% of final score). 7 calibration adjustment(s) were applied.

Confidence Sources

- Repository completeness: 100/100
- Documentation quality: present
- Evidence coverage: 100/100
- Agent agreement: inferred from calibrated specialist scores
- Dataset artifact detected

Penalties

- technical: Dataset artifacts strengthen technical evidence (+4)
- technical: REST/API implementation detected (+4)
- technical: Database integration detected (+3)
- technical: External integration evidence detected (+3)
- security: Authentication implementation detected (+4)
- scalability: Advanced architecture component detected (+5)
- innovation: Custom algorithmic implementation detected (+6)

Detailed Findings

Forge Analysis

Forge Analysis
Technical Score:
79/100
Strengths:
Modular architecture with clear separation of frontend and backend
Use of Docker for containerization and deployment simplicity
Weaknesses:
Limited test coverage (32 test files out of 200 code files)
No explicit mention of security measures or practices in the documentation
Risks:
Potential lack of scalability due to hackathon constraints
Dependence on external services without fallbacks or alternatives mentioned

Sentinel Analysis

Sentinel Analysis
Security Score:
69/100
Risk Level:
LOW
Findings:
None evidenced.
Recommendations:
Run a security review and document controls.
Confidence:
80%

Visionary Assessment

Visionary Analysis
Innovation Score:
82/100
Scalability Score:
70/100
Differentiators:
Multi-agent evaluation system
Real-time SSE progress streaming
Use of local Ollama models
Risks:
Risk of dependency on external services and limited parallel agent processing
Recommendations:

Guardian Impact Analysis

Guardian Analysis
Impact Score:

67/100
Top Risks:
Potential security vulnerabilities due to open ports and environment variables
Lack of comprehensive testing
Inadequate documentation for deployment
Expected Impact:
Docker configuration issues
Dependency version conflicts
Insufficient error handling in backend

Top Failure Predictions

1. Docker configuration issues
2. Dependency version conflicts
3. Insufficient error handling in backend

Scalability Assessment

Visionary Scalability Assessment
Scalability Score:
70/100
Risks:
Risk of dependency on external services and limited parallel agent processing
Recommendations:
Validate capacity assumptions with load tests and deployment evidence.

Showcase Review

Showcase Analysis
Presentation Score:
67/100
Strengths:
Clear problem statement addressing current evaluation processes
Innovative solution using AI for project evaluation
Improvements:
Enhance clarity of the problem/solution narrative in slides and documentation
Include more visual aids to support key points
Confidence:
80%

Cross Examination Results

No major contradictions detected across specialist agents.

Final Verdict

Blocking Issues

- No blocking issues recorded.

Recommended Fixes

1. Implement additional security measures to improve Security Health from 100.0% to a more robust level
2. Enhance testing capabilities to increase Testing Health beyond 57.9%

Deployment Roadmap

1. Review and refine the modular architecture for improved scalability
2. Develop and implement a comprehensive testing framework
3. Integrate additional security features to enhance overall system resilience

Deployment Decision

Verdict: CONDITIONAL_APPROVE
Overall Score: 75/100
Risk Level: LOW
