

YOWON AI

Autonomous AI Jury Platform

Yowon ai
Hackathon Project

70	CONDITIONAL_APPROVE	MEDIUM
Overall Score	Deployment Decision	Risk Level

Generated: July 10, 2026 10:41 UTC

Executive Summary

Overview

The overall score is 70, indicating a `CONDITIONAL_APPROVE` verdict with a `MEDIUM` risk level. The agent scores are: technical (79), security (62), scalability (63), innovation (75), presentation (58), and impact (60).

Evaluation Context

Item	Value
Selected Project Type	Hackathon Project
AI Detected Type	Enterprise System (62% confidence)
Scoring Rubric Used	Hackathon Project
Evaluation Standard	Prototype quality, innovation, demo readiness, and execution under time constraints
Score Band	Strong
Confidence	94/100
Evidence Quality	Exceptional
Repository Completeness	100/100

Repository Statistics

Item	Value
Total Files	258
Code Files	202
Documentation Files	15
Presentation Files	0
Test Files	27
Configuration Files	10
Deployment Files	4
Data Files	1
Source Modules	205
Meaningful Files	228
Repository Completeness Score	100

Score Table

Category	Score	Grade
Forge	79/100	B
Sentinel	62/100	C
Scale	63/100	C
Visionary	75/100	B
Showcase	58/100	C
Guardian	60/100	C

Category Score Chart

Radar Chart

Risk Visualization

Risk Area	Signal	Risk Level
Security Risk	MEDIUM	
Evidence Gaps	1	
Deployment Readiness	70/100	

Strengths

- Modular architecture with clear separation of frontend and backend
- Use of FastAPI for the backend API

Weaknesses

- Missing secure configuration management for secrets in .env.example file
- No encryption or obfuscation of sensitive data

Positive Factors

- Source code detected
- Documentation present
- Automated testing detected
- Machine learning implementation
- Dataset artifacts detected
- Backend architecture present
- Deployment files present
- Modular architecture detected

Missing Evidence

- No additional missing evidence detected

Deployment Roadmap

1. Review and implement secure configuration management for secrets
2. Encrypt or obfuscate sensitive data in the application

Architecture Summary

Detected frontend, backend, database, ml pipeline, api layer, deployment layer, authentication, integrations, agent systems

Detected Technologies

- ChromaDB
- CrewAI
- FastAPI
- LangChain
- React
- SQLAlchemy

Detected Algorithms

- Agent System
- Graph Algorithm
- RAG
- Recommendation System
- Search/Ranking

Evidence Found

- Custom algorithm
- REST API
- Database
- Authentication
- Docker/deployment
- Testing
- Security implementation
- External integrations
- Agent system

Evidence Missing

- Machine learning model
- Queue/background jobs
- Vector database

Project Type Justification

Detected Enterprise System from code/docs/repository signals.

Calibration Explanation

Implementation evidence increased confidence: Custom algorithm, REST API, Database, Authentication, Docker/deployment, Testing. Missing evidence primarily reduces confidence unless required by project type: Machine learning model, Queue/background jobs, Vector database. Community impact contributed a bounded signal (6/100, capped at 15% of final score). 7 calibration adjustment(s) were applied.

Confidence Sources

- Repository completeness: 100/100
- Documentation quality: present
- Evidence coverage: 100/100
- Agent agreement: inferred from calibrated specialist scores
- Dataset artifact detected

Penalties

- technical: Dataset artifacts strengthen technical evidence (+4)
- technical: REST/API implementation detected (+4)
- technical: Database integration detected (+3)
- technical: External integration evidence detected (+3)
- security: Authentication implementation detected (+4)
- scalability: Advanced architecture component detected (+5)
- innovation: Custom algorithmic implementation detected (+6)

Detailed Findings

Forge Analysis

Forge Analysis
Technical Score:
79/100
Strengths:
Modular architecture with clear separation of frontend and backend
Use of FastAPI for the backend API
Good documentation presence
Weaknesses:
Lack of production-scale security measures
Limited test coverage (55.0/100)
No explicit mention of CI/CD pipeline
Risks:

Sentinel Analysis

Sentinel Analysis
Security Score:
62/100
Risk Level:
MEDIUM
Findings:
Missing secure configuration management for secrets in .env.example file
No encryption or obfuscation of sensitive data
Recommendations:
Address finding: Missing secure configuration management for secrets in .env.example file
Address finding: No encryption or obfuscation of sensitive data
Confidence:

Visionary Assessment

Visionary Analysis
Innovation Score:
75/100
Scalability Score:
63/100
Differentiators:
Multi-agent evaluation system
Real-time SSE progress streaming
Risks:
Risk of dependency on external services and limited parallel agent processing
Recommendations:
Document novelty, baseline comparison, and scale assumptions.

Guardian Impact Analysis

Guardian Analysis

Impact Score:
60/100
Top Risks:
Lack of production-scale testing
Insufficient error handling in backend
Potential security vulnerabilities due to static analysis findings
Expected Impact:
Docker configuration errors
Dependency version conflicts
Unstable API responses from Ollama models

Top Failure Predictions

- 1. Docker configuration errors
- 2. Dependency version conflicts
- 3. Unstable API responses from Ollama models

Scalability Assessment

Visionary Scalability Assessment
Scalability Score:
63/100
Risks:
Risk of dependency on external services and limited parallel agent processing
Recommendations:
Validate capacity assumptions with load tests and deployment evidence.

Showcase Review

Showcase Analysis
Presentation Score:
58/100
Strengths:
Clear problem statement addressing current evaluation processes
Use of AI for project evaluation demonstrates innovation potential
Improvements:
Enhance clarity and detail in the presentation slides and documentation
Include more concrete examples of how Yowon AI addresses security, scalability, and real-world impact concerns
Confidence:
70%

Cross Examination Results

No major contradictions detected across specialist agents.

Final Verdict

Blocking Issues

- No blocking issues recorded.

Recommended Fixes

- 1. Implement secure configuration management for secrets
- 2. Encrypt or obfuscate sensitive data

Deployment Roadmap

- 1. Review and implement secure configuration management for secrets
- 2. Encrypt or obfuscate sensitive data in the application

Deployment Decision

Verdict: CONDITIONAL_APPROVE
Overall Score: 70/100
Risk Level: MEDIUM
