

YOWON AI

Autonomous AI Jury Platform

Yowon AI
Hackathon Project

75	CONDITIONAL_APPROVE	LOW
Overall Score	Deployment Decision	Risk Level

Generated: July 08, 2026 06:38 UTC

Executive Summary

Overview

The overall score is 75, indicating a `CONDITIONAL_APPROVE` verdict with a `LOW` risk level. The system demonstrates strong technical capabilities (79) and innovation (82), but lags in security (69), scalability (70), presentation (67), impact (67), and testing health (57.9).

Evaluation Context

Item	Value
Selected Project Type	Hackathon Project
AI Detected Type	Enterprise System (62% confidence)
Scoring Rubric Used	Hackathon Project
Evaluation Standard	Prototype quality, innovation, demo readiness, and execution under time constraints
Score Band	Strong
Confidence	96/100
Evidence Quality	Exceptional
Repository Completeness	100/100

Repository Statistics

Item	Value
Total Files	285
Code Files	200
Documentation Files	26
Presentation Files	0
Test Files	32
Configuration Files	22
Deployment Files	4
Data Files	1
Source Modules	204
Meaningful Files	249
Repository Completeness Score	100

Score Table

Category	Score	Grade
Forge	79/100	B
Sentinel	69/100	B
Scale	70/100	B
Visionary	82/100	A
Showcase	67/100	B
Guardian	67/100	B

Category Score Chart

Radar Chart

Risk Visualization

Risk Area	Signal	Risk Level
Security Risk	LOW	
Evidence Gaps	1	
Deployment Readiness	75/100	

Strengths

- Modular architecture with clear separation of frontend and backend
- Use of Docker for containerization and deployment readiness

Weaknesses

- Security score is lower than other areas at 69
- Testing Health: 57.9/100

Positive Factors

- Source code detected
- Documentation present
- Automated testing detected
- Machine learning implementation
- Dataset artifacts detected
- Backend architecture present
- Deployment files present
- Modular architecture detected

Missing Evidence

- No additional missing evidence detected

Deployment Roadmap

1. Improve security by implementing additional security measures
2. Enhance testing capabilities through automated testing tools and processes

Architecture Summary

Detected frontend, backend, database, ml pipeline, api layer, deployment layer, authentication, integrations, queues, vector databases, agent systems

Detected Technologies

- Celery
- ChromaDB
- CrewAI
- FastAPI
- LangChain
- React
- SQLAlchemy
- scikit-learn

Detected Algorithms

- Agent System
- Graph Algorithm
- RAG
- Random Forest
- Recommendation System
- Search/Ranking

Evidence Found

- Machine learning model
- Custom algorithm
- REST API
- Database
- Authentication
- Docker/deployment
- Testing

- Security implementation
- External integrations
- Queue/background jobs
- Vector database
- Agent system

Evidence Missing

- No missing implementation evidence recorded.

Project Type Justification

Detected Enterprise System from code/docs/repository signals.

Calibration Explanation

Implementation evidence increased confidence: Machine learning model, Custom algorithm, REST API, Database, Authentication, Docker/deployment. Community impact contributed a bounded signal (6/100, capped at 15% of final score). 7 calibration adjustment(s) were applied.

Confidence Sources

- Repository completeness: 100/100
- Documentation quality: present
- Evidence coverage: 100/100
- Agent agreement: inferred from calibrated specialist scores
- Dataset artifact detected

Penalties

- technical: Dataset artifacts strengthen technical evidence (+4)
- technical: REST/API implementation detected (+4)
- technical: Database integration detected (+3)
- technical: External integration evidence detected (+3)
- security: Authentication implementation detected (+4)
- scalability: Advanced architecture component detected (+5)
- innovation: Custom algorithmic implementation detected (+6)

Detailed Findings

Forge Analysis

Forge Analysis

Technical Score:

79/100

Strengths:

Modular architecture with clear separation of frontend and backend

Use of Docker for containerization and deployment readiness

Weaknesses:

Limited test coverage (32 test files out of 200 code files)

No explicit mention of security practices or measures in the documentation

Risks:

Potential lack of robust error handling and logging mechanisms

Dependencies not version locked, which could lead to unexpected behavior

Sentinel Analysis

Sentinel Analysis

Security Score:

69/100

Risk Level:

LOW

Findings:

None evidenced.

Recommendations:

Run a security review and document controls.

Confidence:

80%

Visionary Assessment

Visionary Analysis

Innovation Score:

82/100

Scalability Score:

70/100

Differentiators:

Multi-agent evaluation system

Real-time SSE progress streaming

Use of local Ollama models

Risks:

Risk of dependency on external services for model inference

Recommendations:

Guardian Impact Analysis

Guardian Analysis

Impact Score:

67/100

Top Risks:

Potential security vulnerabilities due to open environment variables

Lack of comprehensive error handling

Single point of failure in backend architecture

Expected Impact:

Docker configuration issues

Dependency conflicts in backend

Insufficient test coverage

Top Failure Predictions

- 1. Docker configuration issues
- 2. Dependency conflicts in backend
- 3. Insufficient test coverage

Scalability Assessment

Visionary Scalability Assessment

Scalability Score:

70/100

Risks:

Risk of dependency on external services for model inference

Recommendations:

Validate capacity assumptions with load tests and deployment evidence.

Showcase Review

Showcase Analysis

Presentation Score:

67/100

Strengths:

Clear problem statement addressing current evaluation processes

Innovative solution leveraging AI for project assessment

Improvements:

Enhance clarity and structure of the presentation materials

Include more visual aids to support the narrative

Confidence:

90%

Cross Examination Results

No major contradictions detected across specialist agents.

Final Verdict

Blocking Issues

- No blocking issues recorded.

Recommended Fixes

- 1. Implement additional security measures to improve the security score
- 2. Enhance testing capabilities to increase Testing Health

Deployment Roadmap

- 1. Improve security by implementing additional security measures
- 2. Enhance testing capabilities through automated testing tools and processes

Deployment Decision

Verdict: CONDITIONAL_APPROVE
Overall Score: 75/100
Risk Level: LOW
