

YOWON AI

Autonomous AI Jury Platform

Yowon ai
Hackathon Project

70	CONDITIONAL_APPROVE	MEDIUM
Overall Score	Deployment Decision	Risk Level

Generated: July 09, 2026 09:09 UTC

Executive Summary

Overview

The overall score is 70, indicating a `CONDITIONAL_APPROVE` verdict with a `MEDIUM` risk level. The agent scores are: technical (77), security (62), scalability (63), innovation (75), presentation (58), and impact (67).

Evaluation Context

Item	Value
Selected Project Type	Hackathon Project
AI Detected Type	Enterprise System (62% confidence)
Scoring Rubric Used	Hackathon Project
Evaluation Standard	Prototype quality, innovation, demo readiness, and execution under time constraints
Score Band	Strong
Confidence	96/100
Evidence Quality	Exceptional
Repository Completeness	100/100

Repository Statistics

Item	Value
Total Files	285
Code Files	200
Documentation Files	26
Presentation Files	0
Test Files	32
Configuration Files	22
Deployment Files	4
Data Files	1
Source Modules	204
Meaningful Files	249
Repository Completeness Score	100

Score Table

Category	Score	Grade
Forge	77/100	B
Sentinel	62/100	C
Scale	63/100	C
Visionary	75/100	B
Showcase	58/100	C
Guardian	67/100	B

Category Score Chart

Radar Chart

Risk Visualization

Risk Area	Signal	Risk Level
Security Risk	MEDIUM	
Evidence Gaps	1	
Deployment Readiness	70/100	

Strengths

- Technical expertise is strong with a score of 77.
- Innovation is also a notable strength with a score of 75.

Weaknesses

- Security testing or scanning was not performed, which may indicate vulnerabilities.
- The security health score is only 82.0/100, indicating room for improvement.

Positive Factors

- Source code detected
- Documentation present
- Automated testing detected
- Machine learning implementation
- Dataset artifacts detected
- Backend architecture present
- Deployment files present
- Modular architecture detected

Missing Evidence

- No additional missing evidence detected

Deployment Roadmap

1. Review and address security concerns identified by static analysis and testing.
2. Develop a plan to improve security health score above 90.0/100 within the next quarter.
3. Implement secure configuration management for secrets in the .env.example file as soon as possible.

Architecture Summary

Detected frontend, backend, database, ml pipeline, api layer, deployment layer, authentication, integrations, queues, vector databases, agent systems

Detected Technologies

- Celery
- ChromaDB
- CrewAI
- FastAPI
- LangChain
- React
- SQLAlchemy
- scikit-learn

Detected Algorithms

- Agent System
- Graph Algorithm
- RAG
- Random Forest
- Recommendation System
- Search/Ranking

Evidence Found

- Machine learning model
- Custom algorithm
- REST API
- Database
- Authentication
- Docker/deployment
- Testing
- Security implementation
- External integrations
- Queue/background jobs
- Vector database
- Agent system

Evidence Missing

- No missing implementation evidence recorded.

Project Type Justification

Detected Enterprise System from code/docs/repository signals.

Calibration Explanation

Implementation evidence increased confidence: Machine learning model, Custom algorithm, REST API, Database, Authentication, Docker/deployment. Community impact contributed a bounded signal (6/100, capped at 15% of final score). 7 calibration adjustment(s) were applied.

Confidence Sources

- Repository completeness: 100/100
- Documentation quality: present
- Evidence coverage: 100/100
- Agent agreement: inferred from calibrated specialist scores
- Dataset artifact detected

Penalties

- technical: Dataset artifacts strengthen technical evidence (+4)
- technical: REST/API implementation detected (+4)
- technical: Database integration detected (+3)
- technical: External integration evidence detected (+3)
- security: Authentication implementation detected (+4)
- scalability: Advanced architecture component detected (+5)
- innovation: Custom algorithmic implementation detected (+6)

Detailed Findings

Forge Analysis

Forge Analysis
Technical Score:
77/100
Strengths:
Uses FastAPI for backend
Incorporates multiple AI agents for evaluation
Provides real-time SSE progress streaming
Weaknesses:
Lack of production-scale operations experience
Limited test coverage (57.9%)
No explicit mention of security practices in documentation
Risks:

Sentinel Analysis

Sentinel Analysis
Security Score:
62/100
Risk Level:
MEDIUM
Findings:
Missing secure configuration management for secrets in .env.example file
No explicit security testing or scanning performed
Recommendations:
Address finding: Missing secure configuration management for secrets in .env.example file
Address finding: No explicit security testing or scanning performed
Confidence:

Visionary Assessment

Visionary Analysis
Innovation Score:
75/100
Scalability Score:
63/100
Differentiators:
Multi-agent evaluation system
Real-time SSE progress streaming
Risks:
Risk of limited agent parallelism and potential single point of failure
Recommendations:
Document novelty, baseline comparison, and scale assumptions.

Guardian Impact Analysis

Guardian Analysis

Impact Score:
67/100
Top Risks:
Lack of comprehensive error handling and logging
Insufficient test coverage leading to potential bugs in production
Dependency on external services with no fallbacks or retries
Expected Impact:
Backend service failure due to unhandled exceptions
Data integrity issues from missing validation
Security vulnerabilities from hardcoded secrets

Top Failure Predictions

1. Backend service failure due to unhandled exceptions
2. Data integrity issues from missing validation
3. Security vulnerabilities from hardcoded secrets

Scalability Assessment

Visionary Scalability Assessment
Scalability Score:
63/100
Risks:
Risk of limited agent parallelism and potential single point of failure
Recommendations:
Validate capacity assumptions with load tests and deployment evidence.

Showcase Review

Showcase Analysis
Presentation Score:
58/100
Strengths:
Clear problem statement addressing current evaluation processes
Use of AI for project evaluation is innovative
Improvements:
Need more detailed slides or deck to enhance clarity and engagement
Improve test coverage to ensure robustness
Confidence:
70%

Cross Examination Results

No major contradictions detected across specialist agents.

Final Verdict

Blocking Issues

- No blocking issues recorded.

Recommended Fixes

1. Implement secure configuration management for secrets in the .env.example file.
2. Perform explicit security testing or scanning to identify potential vulnerabilities.

Deployment Roadmap

1. Review and address security concerns identified by static analysis and testing.
2. Develop a plan to improve security health score above 90.0/100 within the next quarter.
3. Implement secure configuration management for secrets in the .env.example file as soon as possible.

Deployment Decision

Verdict: CONDITIONAL_APPROVE
Overall Score: 70/100
Risk Level: MEDIUM
