

YOWON AI

Autonomous AI Jury Platform

Yowon AI
Hackathon Project

69	IMPROVE	MEDIUM
Overall Score	Deployment Decision	Risk Level

Generated: July 09, 2026 07:56 UTC

Executive Summary

Overview

The overall score is 69, indicating a need for improvement. The risk level is medium, and the verdict is IMPROVE. While there are some strengths, such as technical expertise (77) and innovation (75), there are also areas that require attention, including security (62) and scalability (63).

Evaluation Context

Item	Value
Selected Project Type	Hackathon Project
AI Detected Type	Enterprise System (62% confidence)
Scoring Rubric Used	Hackathon Project
Evaluation Standard	Prototype quality, innovation, demo readiness, and execution under time constraints
Score Band	Strong
Confidence	96/100
Evidence Quality	Exceptional
Repository Completeness	100/100

Repository Statistics

Item	Value
Total Files	285
Code Files	200
Documentation Files	26
Presentation Files	0
Test Files	32
Configuration Files	22
Deployment Files	4
Data Files	1
Source Modules	204
Meaningful Files	249
Repository Completeness Score	100

Score Table

Category	Score	Grade
Forge	77/100	B
Sentinel	62/100	C
Scale	63/100	C
Visionary	75/100	B
Showcase	58/100	C
Guardian	60/100	C

Category Score Chart

Radar Chart

Radar profile of calibrated specialist scores

Risk Visualization

Risk Area	Signal	Risk Level
Security Risk	MEDIUM	
Evidence Gaps	1	
Deployment Readiness	69/100	

Strengths

- Technical skills with a score of 77
- Innovation with a score of 75

Weaknesses

- Security with a score of 62
- Scalability with a score of 63

Positive Factors

- Source code detected
- Documentation present
- Automated testing detected
- Machine learning implementation
- Dataset artifacts detected
- Backend architecture present
- Deployment files present
- Modular architecture detected

Missing Evidence

- No additional missing evidence detected

Deployment Roadmap

1. Improve security health by addressing vulnerabilities and implementing secure practices
2. Enhance scalability to meet growing demands
3. Increase testing coverage to improve overall quality

Architecture Summary

Detected frontend, backend, database, ml pipeline, api layer, deployment layer, authentication, integrations, queues, vector databases, agent systems

Detected Technologies

- Celery
- ChromaDB
- CrewAI
- FastAPI
- LangChain
- React
- SQLAlchemy
- scikit-learn

Detected Algorithms

- Agent System
- Graph Algorithm
- RAG
- Random Forest
- Recommendation System
- Search/Ranking

Evidence Found

- Machine learning model
- Custom algorithm
- REST API
- Database
- Authentication
- Docker/deployment

- Testing
- Security implementation
- External integrations
- Queue/background jobs
- Vector database
- Agent system

Evidence Missing

- No missing implementation evidence recorded.

Project Type Justification

Detected Enterprise System from code/docs/repository signals.

Calibration Explanation

Implementation evidence increased confidence: Machine learning model, Custom algorithm, REST API, Database, Authentication, Docker/deployment. Community impact contributed a bounded signal (6/100, capped at 15% of final score). 7 calibration adjustment(s) were applied.

Confidence Sources

- Repository completeness: 100/100
- Documentation quality: present
- Evidence coverage: 100/100
- Agent agreement: inferred from calibrated specialist scores
- Dataset artifact detected

Penalties

- technical: Dataset artifacts strengthen technical evidence (+4)
- technical: REST/API implementation detected (+4)
- technical: Database integration detected (+3)
- technical: External integration evidence detected (+3)
- security: Authentication implementation detected (+4)
- scalability: Advanced architecture component detected (+5)
- innovation: Custom algorithmic implementation detected (+6)

Detailed Findings

Forge Analysis

Forge Analysis
Technical Score:
77/100
Strengths:
Uses FastAPI for backend
Incorporates multiple AI agents for evaluation
Weaknesses:
Lack of production-scale operations considerations
Limited test coverage (57.9%)
Risks:
High static security risk identified
No explicit mention of data privacy or security measures

Sentinel Analysis

Sentinel Analysis
Security Score:
62/100
Risk Level:
MEDIUM
Findings:
Missing secure configuration management for secrets in .env.example file
No encryption of sensitive data
Recommendations:
Address finding: Missing secure configuration management for secrets in .env.example file
Address finding: No encryption of sensitive data
Confidence:

Visionary Assessment

Visionary Analysis
Innovation Score:
75/100
Scalability Score:
63/100
Differentiators:
Multi-agent evaluation system
Real-time SSE progress streaming
Risks:
Risk of limited agent scalability and potential dependency on external services
Recommendations:
Document novelty, baseline comparison, and scale assumptions.

Guardian Impact Analysis

Guardian Analysis

Impact Score:
60/100
Top Risks:
Lack of comprehensive error handling and logging
Inadequate test coverage leading to potential runtime errors
Security vulnerabilities due to missing or weak authentication mechanisms
Expected Impact:
Data integrity issues during real-time streaming
Dependency conflicts in Docker environment
Unstable backend services affecting frontend performance

Top Failure Predictions

1. Data integrity issues during real-time streaming
2. Dependency conflicts in Docker environment
3. Unstable backend services affecting frontend performance

Scalability Assessment

Visionary Scalability Assessment
Scalability Score:
63/100
Risks:
Risk of limited agent scalability and potential dependency on external services
Recommendations:
Validate capacity assumptions with load tests and deployment evidence.

Showcase Review

Showcase Analysis
Presentation Score:
58/100
Strengths:
Clear problem statement addressing current evaluation processes
Innovative solution using AI for project assessment
Improvements:
Enhance clarity and structure of the presentation materials
Provide more detailed examples of how Yowon AI works in practice
Confidence:
70%

Cross Examination Results

No major contradictions detected across specialist agents.

Final Verdict

Blocking Issues

- No blocking issues recorded.

Recommended Fixes

1. Implement secure configuration management for secrets in the .env.example file
2. Encrypt sensitive data

Deployment Roadmap

1. Improve security health by addressing vulnerabilities and implementing secure practices
2. Enhance scalability to meet growing demands
3. Increase testing coverage to improve overall quality

Deployment Decision

Verdict: IMPROVE
Overall Score: 69/100
Risk Level: MEDIUM
